Amendments to the Claims:

Please amend the claims as follows:

- 1. (Currently amended) A method of preparing moulded confectionery articles, comprising the steps of:
 - (1) preparing a liquid candy composition which solidifies upon cooling, said liquid candy composition being at a first temperature;
 - (2) preparing a liquid chocolate composition which solidifies upon cooling, said liquid chocolate composition being at a second temperature which is lower than said first temperature;
 - (3) co-depositing the liquid candy composition and the liquid chocolate composition in moulds; and
 - (4) cooling the moulded compositions in the moulds so as to solidify the moulded compositions to form moulded confectionery articles;

wherein the liquid chocolate composition is subjected to a high shear of at least 100s⁻¹, before being co-deposited in the moulds,

wherein the chocolate composition is subjected to the high shear in the depositor immediately prior to being introduced into the moulds during step (3).

- 2. (Original) The method of claim 1, wherein the liquid chocolate composition is subjected to a shear of from 100 to 1000s⁻¹.
- 3. (Original) The method of claim 1, wherein the liquid chocolate composition is subjected to a shear of from 200 to 500s⁻¹.
- 4. (Currently amended) The method of claim 1, wherein the candy composition is a hardy hard candy or caramel composition and the first temperature is from 135°C up to 150°C.

5. (Previously presented) The method of claim 1, wherein the second temperature is about 40°C.

- 6. (Previously presented) The method of claim 1, wherein the chocolate composition is a milk chocolate composition.
- 7. (Original) The method of claim 6, wherein up to 10% dark chocolate is added to the milk chocolate composition prior to step (3).
- 8. (Previously presented) The method of claim 1, wherein additional fat is added to the chocolate composition so as to increase its fat content by at least 1% by weight, prior to step (3).
- 9-10. (Cancelled)
- 11. (Previously presented) The method of claim 1, wherein the chocolate composition is subjected to a pre-shear prior to step 3.
- 12. (Original) The method of claim 11, wherein the pre-shear is in the range of from 100s⁻¹ to 5000s⁻¹.
- 13. (Previously presented) The method of claim 11, wherein the pre-shear is greater than the high shear.
- 14. (Cancelled)
